;    41          0041  1 ! AUTHOR:        JPK
;    42          0042  1 !
;    43          0043  1 ! CREATION DATE: December 1981
;    44          0044  1 !
;    45          0045  1 ! MODIFIED BY:
;    46          0046  1 !
;    47          0047  1 !       005     JPK00017        23-Feb-1983
;    48          0048  1 !               Modified NDXINI to initialize the zero'th entries of LLINES,
;    49          0049  1 !               RLINES and TLINES which is where the telltale strings are
;    50          0050  1 !               stored by NDXFMT.
;    51          0051  1 !               Modified NDXFMT to write appropriate prologue for /TELLTALE,
;    52          0052  1 !               save the appropriate lines for left and right telltales, and
;    53          0053  1 !               to mark the end of every entry with a NULL.
;    54          0054  1 !               Modified NDXPAG to change the NULL following each entry to a
;    55          0055  1 !               space if LAYOUT is SEPARATE or to a comma otherwise and to
;    56          0056  1 !               generate and output telltales.
;    57          0057  1 !
```

```
;    58          0058  1 !        004     JPK00015        04-Feb-1983
;    59          0059  1 !                Cleaned up module names, modified revision history to
;    60          0060  1 !                conform with established standards. Updated copyright dates.
;    61          0061  1 !
;    62          0062  1 !        003     JPK00009        24-Jan-1983
;    63          0063  1 !                Modified to enhance performance. The sort buckets have each
;    64          0064  1 !                been divided into 27 sub-buckets; 1 for each letter and 1
;    65          0065  1 !                for non-alphas. Removed reference to BUCKET from INDEX.
;    66          0066  1 !                Definition of the structure was added to NDXPOL. References
;    67          0067  1 !                to BUCKET were changed in modules NDXOUT, NDXINI, NDXFMT
;    68          0068  1 !                and NDXDAT.
;    69          0069  1 !

;  R0360  1        ! ABSTRACT:
;  R0361  1        !   This file contains literals and macros defining the data structures
;  R0362  1        !   found in the internal index pool
;  R0363  1        !
;  R0364  1        ! ENVIRONMENT:    Transportable
;  R0365  1        !
;  R0366  1        ! AUTHOR:         JPK
;  R0367  1        !
;  R0368  1        ! CREATION DATE: January 1982
;  R0369  1        !
;  R0370  1        ! MODIFIED BY:
;  R0371  1        !
;  R0372  1        !       003     JPK00015        04-Feb-1983
;  R0373  1        !               Cleaned up module names, modified revision history to
;  R0374  1        !               conform with established standards. Updated copyright dates.
;  R0375  1        !
;  R0376  1        !       002     JPK00009        24-Jan-1983
;  R0377  1        !               Modified to enhance performance. The sort buckets have each
;  R0378  1        !               been divided into 27 sub-buckets; 1 for each letter and 1
;  R0379  1        !               for non-alphas. Removed reference to BUCKET from INDEX.
;  R0380  1        !               Definition of the structure was added to NDXPOL. References
;  R0381  1        !               to BUCKET were changed in modules NDXOUT, NDXINI, NDXFMT
;  R0382  1        !               and NDXDAT.

;   R0578  1        ! ABSTRACT:
;   R0579  1        !       A page number carries with it not only its current value, but also
;   R0580  1        !       codes as to how those values are to be displayed when they are finally
;   R0581  1        !       output. It was decided to do it this way rather than have a separate
;   R0582  1        !       table so that the program TCX would have less trouble.
